**Subject:** RE: CMRP BSAF Sediment Sampling FSP

Hi Dave,

Pursuant to our discussion at the October 28, 2019 meeting when you confirmed that the sampling nodes were selected randomly within strata (sections of the pond), information in your November 4<sup>th</sup> email, and the October 24, 2019 approval of CMRP BSAF Sediment Sampling FSP in the email below, you can proceed to conduct surface sediment sampling in Georgiaville and Greystone Mill ponds.

Thank you, Anna
